

LUSH Controller

LUSH Assistant Controller – 2008/2009

American Studies Society Member – 2008/2009

Member of LUSH since 2007

- Having been assistant controller in my second year of university I know the hard work that is involved in running the station. My previous experience is beneficial to LUSH as I already know the inner workings of the station.
- I believe that there needs to be a long term plan for the station, stretching over the next five years to move the station forward. There needs to be long term changes and not just quick fixes.
- I would like to work with both the rest of the Exec and the Activities Sabb to help expand LUSH's possibilities, such as working alongside DMU's Demon FM.
- I want to help and endorse LUSH across the university. I would like to get the station more promotion and make it more social.
- LUSH needs to get involved in more events with other student radio stations as well as becoming part of the Student Radio Association (SRA). By being part of this, we can gather ideas on how to move the station forward.
- I want to use my place on Student Council to get the funding the station needs and bring us up to date with other stations around the country.
- For those involved in LUSH who would like a career in media, I would like to try and establish some contacts so that members could gain some work experience within the media industry to help them after they leave university.
- I have been part of the station since my first year and have complete dedication to it. Being the controller is something I have strived towards and I will give it my full commitment.
